

# HAIR TRANSPLANT FORUM INSTRUCTIONAL VIDEO TAPE

**M**any doctors have requested video tapes of hair transplant surgery. I believe the future of medical/surgical education lies in that medium. The Forum is entering the new era with the introduction of **HAIR TRANSPLANT VIDEO FORUM.**

## VOLUME ONE

The first production will be a set of two tapes, four hours in all, showing about 30 patients as they come through my office. They are

in all phases of their transplants, from new to touch-ups.

Dialogue concerns patient selection, designs, graft placement, holes, slits, large grafts, hairline placement, hair style and hair type.

There is also footage of the actual procedure: drawing hairlines, cutting grafts and strips, planting grafts, cutting minigrafts and micrografts, etc. Viewing these tapes will be equivalent to spending two to four weeks

observing in my office.

## FUTURE TAPE

We want future tapes to consist of subscriber inputs, edited into an educational series. Prices will depend upon production costs and number of tapes sold.

If you are interested in purchasing the first tape, or in contributing to future tapes, please contact me for details.
