Hair Loss in Women

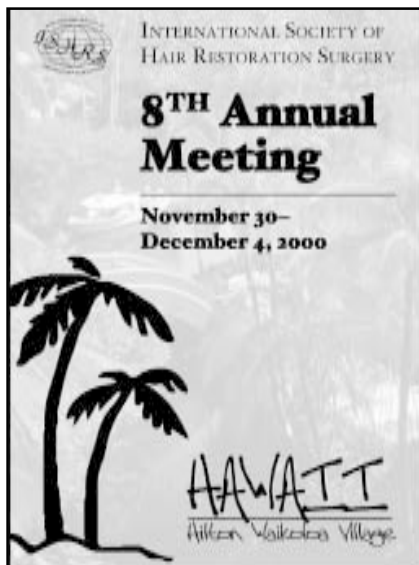

In the recent past, we have been seeing increasing numbers of women who come to our office seeking treatment for their thinning or baldness. We have even begun to see husbands and wives coming in for double consultations. I do not believe that there are more bald women than in the past. I think that more women are seeking better options for their hair loss. I also believe that female hair loss may often be the result of something different than men's hair loss. I thought this would be a good topic to explore in the *Forum*. In our next issue, this space will feature an article by Dr. Paul Cotterill of Toronto, Canada, on the causes and treatment of hair loss in women. It's an excellent and scholarly article that should be of special interest to our Assistants.

Please call or send your contributions or comments to me for the Assistants' Corner to:

TRICOMIN[®]

Introducing Advanced Care For Thinning Hair

Formulated by nature and tested by science, Tricomin[®] Hair Care Products restore hair to healthy vitality. Enriched with patented and clinically tested Triamino Copper Nutritional Complex[™] and essential amino acids, Tricomin hair maintenance products bathe the scalp to stimulate follicles and repair damaged or thinning hair. Men and women alike can now easily maintain a thicker, fuller head of hair. Tricomin is the advanced care solution to thinning hair.

WANTED TWINS

Identical male twins between the ages of 21 and 50 with early hair loss are needed to participate in a nonsurgical hair regrowth study. All physical exams, laboratory work, and medication will be furnished free of charge. All physicians who refer a set of twins will be included as authors on the conclusion paper.

If you have a set of twins for this study (United States and Canada only), please call Dr. Dow Stough at 501-623-6100.
