NEW* Guidelines for Submitting Articles to the *Forum*

*Any person submitting content to be published in the *Forum* agrees to the following:

1. The materials, including photographs, used in this submission do not identify, by name or otherwise, suggest the identity of, or present a recognizable likeness of any patient or others; or, if they do, I have obtained all necessary consents from patients and others for the further use, distribution, and publication of such materials.
2. The author indemnifies and holds harmless the ISHRS from any breach of the above.

In addition, all submissions to the *Forum* must be in electronic format: e-mail, 3.5" PC-formatted disk, or PC-formatted Iomega Zip 100 disk. We prefer Microsoft Word documents, however, WordPerfect and ASCII text files are also acceptable. Please adhere to the following additional guidelines when submitting your article(s):

- ✓ E-mail submissions will only be accepted with an **ATTACHED** document file—**do not** embed the file in your e-mail as we will be unable to use it. Your e-mail program should have an option to attach a file. When e-mailing an article, also be sure to attach any graphic files as well. Artwork (images) must be separate attachments (see bullet #3).
- ✓ If you are mailing your article, please submit both a hard copy of the article(s) **AND** a disk with the article and any graphic files (TIFF, JPEG) copied onto it. Before mailing, please be sure that your article did in fact copy onto the disk.
- ✓ Any artwork, photos, or figures that are referenced in your article must be enclosed with your mailed submission or saved on the disk in either TIFF or JPEG format. Any graphics that are submitted for scanning must be clean, original copies. **When scanning photos for submission, please scan in black and white at a minimum of 150 dpi; for best output, scan at 300 dpi. Keep in mind that most figures appear no larger than 3 inches (width) in the publication, so size accordingly. (This will also reduce the size of your TIFF/JPEG file and keep it manageable.)**
- ✓ Please submit clean originals and clear photos. If you need artwork, graphics, or photos returned, please supply a self-addressed, stamped envelope with your submission and they will be returned promptly.

Send your submissions to:

William M. Parsley, MD
310 East Broadway, Suite 100
Louisville, Kentucky 40202-1745

E-mail: bparsley@bellsouth.net

**Please Note: All entries will be returned if incomplete or not adhering to guidelines.*

**GRAFTCYTE™
 SYSTEM**
*A Head Start on
 Healing*

Specially formulated for hair transplant patients, the GraftCyte™ System provides a quick road to recovery by promoting a healthy healing environment. GraftCyte™ products enhance tissue repair while increasing patient comfort by keeping the graft area moist and richly supplied with our patented copper peptide micronutrient.

Because patients will see reduced crusting and a rapid return of healthy hair, follow-up procedures are possible sooner than ever before. Convenient and easy to use, the GraftCyte™ System can easily be tailored to any patient's lifestyle. Enhance the cosmetic benefit of your hair transplant procedures. *Give your patients a head start for a successful recovery.*
